

Register Now for the 2024 Year 7 Secondary School Immunisations Program

Immunisation saves lives and is a proven and safe way to protect against diseases.

The protection provided by some childhood immunisations fades over time and needs to be boosted in adolescence.

Secondary school students are at an age when a vaccine will be most effective and provide protection before possible exposure to a disease.

Making sure your child receives their secondary school immunisations will help to keep them healthy and well through secondary school and into adulthood.

Immunisations are safe and effective, and administered by a council nurse at secondary schools.

Students in Year 7 (or aged 12-13) receive the human papillomavirus (HPV) vaccine (1 dose) and the diphtheria, tetanus and pertussis (whooping cough) combined vaccine (1 dose).

To help make the program a success, we need you as parents/carers to register and consent on our online booking platform VaxApp.

To register, please go to the website:

<https://bendigo.book.vaxapp.com.au/school/Crusoe7-10SecondaryCollege-KveC5s>

Or scan the QR Code below:

If you need any help or advice, please email:
